

“One of the greatest problems of our time is that many are schooled but few are educated”

Thomas More

Welcome!

Congratulations for signing up for the Nursery and Primary Teacher Training program. This is a wholesome interactive course that will not only widen your understanding about children and how they perceive the world but will introduce you to the complexities of the teaching learning process, inside and outside the classrooms.

The goal of education is to answer the fundamental question, “Who am I and what is my relationship with the universe and others in it”. This is the guiding principle of our pedagogy and curriculum.

We ensure that the teachers are empowered to enable children to emerge as secure individuals with a strong feeling of connectedness.

- The course is spread over **seven modules**.
- The modules contain self reflection activities, reading materials, audio and video resources.
- As you complete each module, you will be guided to learn new topics and educational concepts. Guided practical classes will be done by the trainees periodically according to the course requirement.
- As the modules and topics unfold, you will get to do graded and non-graded assignments. The course also contains practical work. Instructions and guidelines for the same will be provided from time to time.
- Over the course of the program, resources such as pre reads, post reads, videos, books, and assignments will be shared. Most files are in an easily downloadable Microsoft word format.
- Any queries that arise while reading the course material can be emailed and will be acknowledged.
